

QUANTIOM ENERGY SCIENCE

Quantiom Field Reader *Intelligence*

Instruments for reading the unseen spectrum.

THE COMPLETE CATALOG & PRODUCT OVERVIEW

SIX SOVEREIGN DOMAINS · TWELVE INSTRUMENT LINES · THE INTELLIGENCE VAULT

Six Sovereign *Domains*.

One paradigm across the whole spectrum — from the human biofield to the living land, the laboratory, and the frontier of consciousness. Every domain draws on a shared family of spectral instruments and the interpretive intelligence of the Quantiom Vault.

01

Medical & Biofield Science

Multi-paradigm reading of the human field — Western, Traditional Field Medicine, and Sovereign Energetic assessment in a single session.

02

Agricultural & Plant Sciences

Aerial and ground spectral intelligence for regenerative land, crop health, and the living photosynthetic field.

03

Environmental & Ecology

Watershed, forest, and sovereign-land intelligence — from single flights to autonomous 24/7 monitoring.

04

Geological & Mineral

Shortwave-infrared spectral signatures for mineral, soil, and sovereign-land resource intelligence.

05

Industrial & Materials

Laboratory and imaging hyperspectral for food, pharma, materials, recycling, and conservation research.

06

Sovereign & Frontier Research

Biofield science, consciousness research, and quantum biology — technical capability with paradigm framework support.

DOMAIN 01

Medical & Biofield Science

*Multi-paradigm reading of the human field – Western, Traditional Field Medicine, and
Sovereign Energetic assessment in a single session.*

Medical & Biofield Science

The founding domain of the Quantiom paradigm. The Field Medicine Reader family reads the body as a field of coherent light and information — thermal signature, spectral tissue intelligence, substance coherence, and cellular structure.

Sovereign biofield reading
Multi-paradigm assessment combining integrative body-systems, Traditional Field Medicine, and Sovereign Energetic Field interpretation from a single non-contact session.

Substance & supplement coherence
Direct-contact spectral verification of supplements, herbs, tinctures, water, and foods before recommendation — coherence, not only composition.

Cellular biofield research
Convert any microscope into a hyperspectral instrument for healthy-versus-pathological cellular spectral signatures.

Time-series coherence tracking
Baseline and follow-up scans stored in the Quantiom Vault reveal measurable field shifts across sessions, months, and years.

WHO IT SERVES

Integrative & functional medicine

Naturopathic physicians

Acupuncture & Traditional Field Medicine

Energy medicine & biofield therapy

Guardian Practitioners

Wellness & retreat centers

Biofield & cellular researchers

The instruments *that serve it.*

INSTRUMENT	ENERGY EXCHANGE
● Field Medicine Reader · Thermal	from \$8,888
● Field Medicine Reader · Hyperspectral	from \$33,333
● Field Medicine Reader · Spectroscopic	from \$22,222
● Field Medicine Reader · Microscopy	\$66,666

All exchanges flow through Quantiom Energy Science · PMA 508(c)(1)(a) · Quantiom.Earth

DOMAIN 02

Agricultural & Plant Sciences

Aerial and ground spectral intelligence for regenerative land, crop health, and the living photosynthetic field.

Agricultural & Plant Sciences

From entry multispectral to solar-induced chlorophyll fluorescence, this domain reads vegetation stress before it becomes visible, documents regeneration across seasons, and measures photosynthesis itself.

Crop health & yield intelligence

Multispectral and hyperspectral pathways sized to operation scale, from 4-channel entry to full-spectrum aerial capture.

Pest & disease early warning

Red-edge and hyperspectral fingerprints reveal stress and pathogens before visible symptoms appear.

Solar-induced chlorophyll fluorescence

The Plant Coherence Reader measures photosynthetic activity directly — the most advanced plant intelligence in the paradigm.

Regenerative documentation

Quarterly time-series flights build the empirical record of sovereign land transformation for grants, donors, and publication.

WHO IT SERVES

- Regenerative & biodynamic farms
- Vineyards & orchards
- Permaculture & food forests
- Specialty & ceremonial crops
- Agricultural research stations
- Precision-ag service providers
- Tribal stewardship councils
- Pyramid Cities Nodes

The instruments *that serve it.*

INSTRUMENT	ENERGY EXCHANGE
• Sovereign Multispectral · Land Sovereign & Hybrid	from \$13,333
• Ground Sovereign Sensor	from \$5,555
• Aerial Spectral Intelligence · Hyperspectral	from \$44,444
• Plant Coherence Reader · SIF	from \$77,777
• Field Medicine Reader · Spectroscopic	from \$22,222
• Field Medicine Reader · Microscopy	\$66,666

All exchanges flow through Quantiom Energy Science · PMA 508(c)(1)(a) · Quantiom.Earth

DOMAIN 03

Environmental & Ecology

Watershed, forest, and sovereign-land intelligence – from single flights to autonomous 24/7 monitoring.

Environmental & Ecology

Land stewardship at every scale: water quality and watershed health, forest and fire intelligence, remediation progress, and continuous autonomous monitoring of high-value sovereign sites.

Water quality & watershed health

Aerial assessment plus point-precision spectroscopic verification and continuous ground monitoring of high-value water sources.

Sovereign land time-series

Baseline and quarterly flights document measurable transformation across years — the 396-acre Node One is the flagship site.

Forest & wildland intelligence

Pest detection, biodiversity mapping, and multi-modal wildfire risk through vegetation moisture plus thermal hotspot.

Autonomous continuous monitoring

The Sovereign Aerial Nest performs unmanned 24/7 hyperspectral monitoring with hot-swap battery and real-time cloud transmission.

WHO IT SERVES

- Sovereign land stewardship
- Watershed & restoration projects
- Conservation organizations & land trusts
- Parks & protected-area management
- Tribal land councils
- Climate & ecosystem researchers
- Sanctuary networks
- Pyramid Cities Nodes

The instruments *that serve it.*

All exchanges flow through Quantiom Energy Science · PMA 508(c)(1)(a) · Quantiom.Earth

DOMAIN 04

Geological & Mineral

Shortwave-infrared spectral signatures for mineral, soil, and sovereign-land resource intelligence.

Geological & Mineral

Mineral identification requires SWIR depth. This domain spans landscape-scale aerial mapping, handheld point verification, and laboratory sample analysis — serving commercial exploration and ceremonial sovereign-land knowledge alike.

Mineral exploration

Aerial SWIR and extended-SWIR hyperspectral for landscape-scale mineral mapping, with lab and handheld verification.

Soil composition analysis

Substrate spectral signatures read at aerial, point, and laboratory scales.

Sovereign land resource intelligence

Sacred-site and energetic land-feature characterization serving ceremonial stewardship rather than extraction.

Cultural heritage geology

Non-destructive hyperspectral imaging of artifacts, pigments, and geological provenance.

WHO IT SERVES

- Mineral exploration companies

Geological surveys

University earth-sciences

Soil science programs

Environmental consulting

Cultural heritage organizations

Pyramid Cities Nodes

DOMAIN 05

Industrial & Materials

Laboratory and imaging hyperspectral for food, pharma, materials, recycling, and conservation research.

Industrial & Materials

The professional research workhorse of the paradigm. The Sovereign Science Series spans lab and imaging configurations across VIS, NIR, and SWIR — from color and textile research to pharmaceutical formulation and cultural-heritage preservation.

Food quality & nutrition

Spectral quality, contamination, ripeness, and nutritional-density research in lab and imaging configurations.

Pharmaceutical R&D

Composition, formulation, and quality-control spectral analysis, extending to cellular drug-interaction imaging.

Material sorting & recycling

SWIR spectral signatures for plastic and polymer identification and recycling-stream optimization.

Cultural heritage preservation

Non-destructive analysis of artifacts, pigments, and manuscripts with multi-range and full-spectrum systems.

DOMAIN 06

Sovereign & Frontier Research

Biofield science, consciousness research, and quantum biology – technical capability with paradigm framework support.

Sovereign & Frontier Research

A frontier domain underserved by conventional instrumentation. Quantiom supports both the measurement needs and the multi-paradigm interpretive framework — with Node One available as a collaborative research site.

Biofield science research

Imaging and microscopy hyperspectral for the energetic and informational fields of biological systems, integrated with the Vault.

Consciousness research

Multi-paradigm spectral measurement modalities and cross-paradigm interpretive support for emerging protocols.

Quantum biology

High-resolution spectral measurement of photosynthetic efficiency, magnetoreception, and coherence phenomena.

Node One as research site

Collaborative access to the most advanced spectral infrastructure available, with co-authored publication pathways.

WHO IT SERVES

COMPLETE INSTRUMENT INDEX

Every Instrument, *In Detail.*

Full configurations, specifications and Energy Exchange across the twelve instrument lines.

FIELD MEDICINE READER

Thermal from \$8,888

A slim, professional-grade thermal platform that reads the whole-body heat field without touch, radiation, or compression. A single 5–10 minute session generates comprehensive 20–26 page multi-paradigm assessment across Western body-systems and Traditional Field Medicine frameworks.

Whole-body vascular & inflammatory reading

Meridian & acupoint thermal detection

Facial field diagnosis

Baseline & time-series client tracking

EDITIONS · ENERGY EXCHANGE

THERMAL · PRACTITIONER

\$8,888

- ✦ LWIR 8–14μm · <50 mK NETD
- ✦ 256×192 · 12μm pixels
- ✦ 10.95" HD multi-touch · 920g
- ✦ 20–26 page dual-engine reports

THERMAL · ENHANCED

\$13,333

- ✦ Higher-density microbolometer
- ✦ Refined thermal gradient resolution
- ✦ Extended capture presets

THERMAL · ANCHOR

\$22,222

- ✦ Research-grade sensitivity
- ✦ Widest dynamic thermal range
- ✦ Advanced biofield thermography

FIELD MEDICINE READER

Hyperspectral from \$33,333

Captures hundreds to over a thousand spectral channels across visible, near-infrared, and shortwave-infrared — revealing tissue oxygenation, hydration, and deep field intelligence beyond thermal. Generates four-framework reports.

Tissue oxygenation & hydration mapping

Deep-field energetic assessment

Clinical biofield research

Vault time-series intelligence

EDITIONS · ENERGY EXCHANGE

THRESHOLD · VISIBLE

\$33,333

- ✦ ~500 spectral channels
- ✦ 400–1000nm visible
- ✦ Entry multi-paradigm imaging

CODEX · VIS-NIR ★ FLAGSHIP

\$44,444

- ✦ 500–1,200 channels
- ✦ 400–1700nm VIS-NIR
- ✦ Primary flagship of the family
- ✦ Full four-framework reporting

ANCHOR · SWIR

\$77,777

- ✦ Extended SWIR channels to 2500nm
- ✦ Deepest tissue & hydration intelligence
- ✦ Research-tier depth

FIELD MEDICINE READER

Spectroscopic from \$22,222

A handheld fiber-optic contact probe for direct spectral analysis. Verifies biological samples at point precision and reads the spectral coherence of supplements, herbs, tinctures, water, and foods before recommendation.

Supplement & herb coherence verification

Water source coherence reading

Biological sample analysis

Ground-truth for aerial findings

EDITIONS · ENERGY EXCHANGE

THRESHOLD

\$22,222

- ✦ 300–1100nm
- ✦ Fiber-optic contact probe
- ✦ Sample & supplement verification

CODEx · SWIR

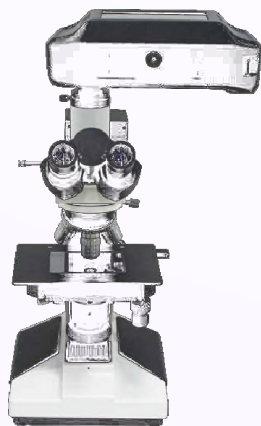

\$33,333

- ✦ 300–1700nm SWIR
- ✦ Substance coherence + tissue
- ✦ Expanded material range

ANCHOR · FULL-SPECTRUM

\$55,555

- ✦ 300–2500nm full-spectrum
- ✦ Mineral & water point-precision
- ✦ Broadest verification capability

FIELD MEDICINE READER

Microscopy \$66,666

Converts any existing microscope into a hyperspectral instrument, enabling spectral analysis at cellular and microscopic scale — from red-blood-cell hemoglobin signatures to healthy-versus-pathological tissue characterization.

Cellular biofield research

Red blood cell spectral analysis

Histopathology & cancer research

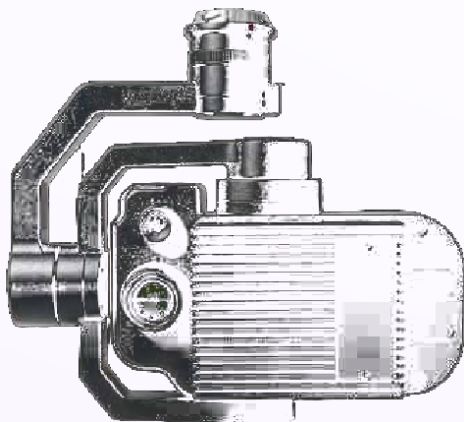

Plant & microbial cellular study

CONFIGURATION · ENERGY EXCHANGE

MICROSCOPY CONVERSION

\$66,666

- ✦ Adapts existing microscopes
- ✦ Cellular hyperspectral imaging
- ✦ Healthy vs pathological signatures
- ✦ Histopathology & microbiology research

AERIAL SPECTRAL INTELLIGENCE

Hyperspectral from \$44,444

The premium airborne hyperspectral line, spanning VIS-NIR vegetation work through extended-SWIR mineral research to full-spectrum flagship capability for the most comprehensive landscape intelligence in the paradigm.

Landscape-scale vegetation mapping

Mineral & substrate exploration

Environmental remediation tracking

Climate & ecosystem research

EDITIONS · ENERGY EXCHANGE

THRESHOLD · VIS-NIR

\$44,444

- ♦ VIS-NIR aerial hyperspectral
- ♦ Vegetation & biofield fingerprinting

CODEX · SWIR

\$77,777

- ♦ Shortwave-infrared aerial
- ♦ Mineral & substrate signatures

ANCHOR · MULTI-RANGE

\$88,888

- ♦ VIS-NIR-SWIR combined
- ♦ Comprehensive landscape intelligence

SOVEREIGN FLAGSHIP · EXTENDED

\$144,444

- ♦ Extended SWIR range
- ♦ Deep mineral & climate research

PYRAMID FLAGSHIP · FULL-SPECTRUM ★

\$222,222

- ♦ Full-spectrum capture
- ♦ Ultimate comprehensive capability
- ♦ Flagship Node deployment

SOVEREIGN MULTISPECTRAL INTELLIGENCE

Land Sovereign & Hybrid Series from \$13,333

The accessible aerial pathway, focused on the exact bands vegetation and land work require. Ranges from 4-channel entry to a signature thermal-integrated multi-modal instrument, plus a hybrid series delivering 30 to 180 selectable channels.

Vegetation health & NDVI / NDRE

Multi-modal thermal + vegetation

Water & watershed assessment

Routine time-series flights

LAND SOVEREIGN · ENERGY EXCHANGE

STANDARD

\$13,333

- ✦ 4-channel MS + RGB
- ✦ 1.3MP MS / 11.9MP RGB
- ✦ 9.6cm ground res @120m

ENHANCED

\$14,444

- ✦ 6-channel MS
- ✦ Sapphire window · ≤940g
- ✦ Added 750nm red-edge band

THERMAL SOVEREIGN INTEGRATED ★

\$17,777

- ✦ 4ch MS + RGB + LWIR thermal
- ✦ Signature multi-modal capture
- ✦ No commercial equivalent at tier

PREMIUM

\$18,888

- ✦ 9-channel · 3.14MP
- ✦ ≤400g ultralight
- ✦ 4.5cm precision @120m

PLANT COHERENCE READER

Solar-Induced Fluorescence from \$77,777

The most advanced plant intelligence capability in the paradigm — measuring solar-induced chlorophyll fluorescence to read photosynthetic activity directly, across ground, tower, and aerial deployment.

Gross primary production estimation

Crop photosynthetic productivity

Drought & stress response research

Ecosystem carbon flux measurement

CONFIGURATIONS · ENERGY EXCHANGE

LINE-SCAN

\$77,777

- ✦ Ground-based line-scan
- ✦ Large-scale field SIF research

IMAGING

\$99,999

- ✦ Tower-based imaging
- ✦ Fixed-point continuous SIF monitoring

AERIAL

\$111,111

- ✦ UAV aerial SIF
- ✦ Sovereign land aerial deployment

GROUND SOVEREIGN SENSOR

Fixed Continuous Multispectral from \$5,555

Fixed-installation multispectral sensors for continuous monitoring at high-value reference points — vegetation, water sources, and sovereign sites read around the clock.

Continuous vegetation monitoring

High-value water source watch

Reference-point time-series

Sanctuary & Node infrastructure

CONFIGURATIONS · ENERGY EXCHANGE

STANDARD

\$5,555

- ✦ 4-channel MS + RGB

Survey Service · *by engagement.*

A service engagement for those who need sovereign spectral intelligence without owning instruments — Quantiom deploys the appropriate aerial, ground, and laboratory capability and delivers Vault-hosted intelligence.

One-time or periodic land survey

Custom-scoped per site — aerial, ground and laboratory capability deployed as the land requires.

Grant & donor documentation

The empirical record that funds and validates sovereign land transformation.

Feasibility & baseline studies

No equipment stewardship required — Vault-delivered intelligence from the first flight.

♦ Energy Exchange · By engagement — info@quantiom.org

THE PROPRIETARY ADD-ON

The QFR Intelligence Vault™

Quantum field scanning & recalibration – where the instruments capture the spectrum, the Vault interprets it.

70 INTERPRETATION LAYERS · 6 SOVEREIGN VERTICALS · 12 MODALITIES

HOW IT WORKS

Seventy layers read *the field signature*.

01

Capture on any device

Scan with any Quantiom Field Reader — thermal, hyperspectral, spectroscopic, aerial, or laboratory.

02

Upload the spectral data

Images and scans upload directly from the cameras into the Intelligence Vault — one universal system across the whole device family.

03

Interpret & recalibrate

Seventy sovereign interpretation layers read the field signature within each wavelength and generate interpretation plus recalibration transmissions.

MODE 01 · STANDALONE

Real-time field reading

Works with no instrument whatsoever
Continuous real-time field assessment
Recalibration transmitted live through the quantum field
Scalar + entanglement based — non-local, distance-independent

MODE 02 · INTEGRATED

Paired with any device

Upload images & scans from any Quantiom camera
Attach prior reports and supporting context
Cross-references captured imagery with the field read
Deeper, layered analysis and targeted recalibration

Request a sample [Quantiom Vault transmission report](mailto:info@quantiom.org) at info@quantiom.org · [Quantiom.Earth](https://quantiom.org)

THE SCIENCE

Reading the Unseen Spectrum.

A century of field science – spectral, quantum and scalar – converging into one sovereign instrument family.

Nine principles beneath *the instruments*.

01

Everything Radiates a Spectrum

Every living system emits, absorbs and reflects electromagnetic energy across a vast spectrum — far wider than the eye perceives. Reading that full signature reveals state, function and coherence long before it becomes visible.

02

Quantum Entanglement

Once two systems interact they remain correlated — a change in one is mirrored in the other instantaneously, regardless of distance. This non-local link lets the Vault read and recalibrate without physical proximity.

03

Information Is Non-Local

The field carries a complete, readable signature of the whole. Because that information is not bound to a single location, the full state of a system can be assessed from its field alone.

04

Scalar Fields Carry Structure

Longitudinal scalar waves encode and transmit organised information through the field — the medium through which the Vault both reads a signature and returns a recalibration.

05

Resonance & Entrainment

Systems tuned to a shared frequency exchange energy efficiently and drift into rhythm together. A precise resonant pattern can invite a field to re-entrain.

06

Coherence Can Be Restored

A field pushed out of coherence can be guided back toward it. Recalibration transmits a corrective pattern and the system re-entrains toward its own healthy baseline.

07

Water Holds & Carries Pattern

The structured water within living tissue stores and relays field information, acting as an internal antenna — a key reason biological systems are so responsive to spectral and scalar input.

08

The Observer Participates

At the quantum scale, measurement is not passive — the act of reading a system participates in its state. Assessment and recalibration are a single continuous act.

09

Frequency Precedes Form

Pattern comes before matter — a coherent field organises physical structure, not the other way around. Reading and tuning the field reaches the system at its origin.

PIONEERS OUR WORK IS BUILT ON

Standing on *giants'* shoulders.

SCALAR & WIRELESS ENERGY

Nikola Tesla

Longitudinal (scalar) waves and resonance — the foundation for transmitting structured energy and information through the field without wires.

QUANTUM FOUNDATIONS

Max Planck & Albert Einstein

Energy is quantised and matter and energy are interchangeable — the bedrock that everything material is, at root, patterned energy.

FREQUENCY & RESONANCE THERAPY

Royal Raymond Rife

Specific resonant frequencies affect biological structures — an early demonstration that matter responds to targeted frequency.

BIOPHOTONICS

Fritz-Albert Popp

Living cells emit coherent light (biophotons); the coherence of that emission tracks the health of the system — direct grounding for spectral field reading.

BIOELECTRIC FIELDS

Harold Saxton Burr

All living things are shaped and organised by measurable electrodynamic “fields of life” that precede physical change.

ELECTROPHOTONIC IMAGING

Konstantin Korotkov

Modern instrumentation for capturing and interpreting the energy field of living systems — a contemporary bridge to field diagnostics.

One science, *six expressions.*

Medical & Biofield

Hyperspectral, thermographic and biophotonic reading of the human field. Popp's biophoton coherence and Burr's bioelectric fields of life meet Rife's resonance work.

- Thermography
- Biofield Hyperspectral
- Biophotonics
- Meridian Coherence

Agricultural & Plant

Solar-induced fluorescence and hyperspectral crop reading. Photosynthesis emits a faint fluorescent signature whose coherence tracks vitality.

- Solar-Induced Fluorescence
- Hyperspectral
- Plant Coherence
- Canopy Stress

Environmental & Aerial

Aerial and ground spectral survey mapping land, water and ecosystem fields across wide areas — the health of a whole landscape made legible.

- Aerial Land
- Multispectral Reflectance
- Water Fields
- Thermal Survey

Laboratory & Microscopy

Cellular-scale spectral microscopy and nucleotide frequency work, grounded in Planck's quantisation of energy.

- Cellular Microscopy
- Nucleotide Resequencing
- Photoacoustic
- Spectroscopic

Frontier & Field Science

Infrared, frequency-to-matter and field-shaping research — Tesla's scalar lineage applied to frontier physics.

- Infrared Spectrum
- Frequency-to-Matter
- Scalar Field
- Inverted Spectrum

Sovereign & Consciousness

Light-to-sound translation and consciousness field work — where entanglement and the observer effect become tools for reading the field of awareness itself.

- Light-to-Sound
- Scalar Recalibration
- Field Coherence
- Consciousness Layers

MULTI-INSTRUMENT DEPLOYMENTS

Bundles & Sovereign Deployments.

Curated multi-instrument deployments unify complementary capabilities into a single sovereign practice, land, or research program.
