Field Medicine Reader

— *Thermal* —

Medicine that sees what was previously unseen — the first deployable instrument of the
Inverted Spectrum Quantum Medicine paradigm.

THE QUANTUM FIELD DIAGNOSTICS SERIES · FOUNDING INSTRUMENT · VOL. I

SOVEREIGN BIOFIELD THERMAL IMAGING · QUANTIOM VAULT INTEGRATED · JUNE 2026

THE INVITATION

You already *know*.

You don't need to be convinced that the body is a multidimensional field. You don't need to be persuaded that healing happens across spectra the senses cannot directly perceive.

Now the next layer arrives. The Field Medicine Reader is the first physical instrument designed to read the unseen spectrum — what becomes possible when the energetic and the instrumental finally meet in coherent sovereign architecture.

SOL'ATHIRA'KYA · FOUNDER & CODEX KEEPER ·
QUANTIOM VAULT

This is not just a *thermography device*.

It is a sovereign, multi-paradigm biofield diagnostic platform producing comprehensive 20–26 page assessment reports across multiple healing frameworks — all from a single, non-contact thermal imaging session of 5–10 minutes.

SECTION 01

The Established Science

Thermography – the proven foundation of adjunctive diagnostics, and the doorway into the unseen spectrum.

Heat has always been *a reading of the body.*

Thermography is not a fringe technology. It is a measured tradition stretching from antiquity to today's clinical digital infrared thermal imaging — long established as an adjunctive diagnostic discipline.

C. 400 BCE

Hippocrates

Wet mud spread on the body dried first over regions of greater heat — the earliest recorded thermal reading.

1950S-60S

Infrared Era

Military infrared sensing crosses into medicine, rendering body heat as a visible, mappable field for the first time.

1982

Adjunctive Standing

Thermography is formally recognized as an adjunctive imaging modality — a complement alongside structural diagnostics.

TODAY

Digital Infrared (DITI)

High-resolution sensors and Sovereign Source Intelligence analysis turn the thermal field into precise, repeatable, comparable data.

HOW IT WORKS

The body broadcasts *its function as heat*.

01

Every body radiates infrared

Skin continuously emits infrared energy. A sensitive thermal sensor reads it without touch, radiation, or compression.

02

Skin temperature maps circulation

Surface heat is governed by dermal microcirculation under autonomic control — a live readout of vascular and nervous activity.

03

Pattern & asymmetry tell the story

A healthy body is strikingly symmetrical in heat. Inflammation runs hot; ischemia and nerve patterns run cool. Deviations become visible.

COOL → HOT · VASCULAR & INFLAMMATORY READING

A functional layer that *complements structural imaging.*

Where structural imaging shows anatomy, thermography reads physiology — functional changes in blood flow and tissue activity that can appear before structure changes.

Non-contact

No radiation

Painless

Repeatable

Safe for all ages & conditions

READING THE FIELD

What the body *reveals in heat.*

The trained eye reads three things at once — symmetry between left and right, the gradient across regions, and the hotspots and cool zones that break the pattern. The Field Medicine Reader turns this reading into structured, quantified, comparable data.

Cooler

Warmer

Hottest

SECTION 02

The Instrument

The Field Medicine Reader — Thermal: a slim, sovereign, professional-grade thermal platform built to read the whole body.

Facial Field Reading · focused map

Single Region Reports · targeted

Simple for the client, *profound in its data.*

01

Prepare

Client acclimates 10–15 minutes in a temperature-stabilized room (~24°C). Practitioner builds the digital profile that calibrates the Sovereign Source Intelligence baseline.

02

Image

Four standard positions — front and back, torso and lower body — each captured in seconds and previewed live on the HD screen, retake-ready.

03

Generate

Dual Sovereign Source Intelligence engines produce the comprehensive reports in minutes — archived to the client profile and shared instantly by QR code.

Infrared Thermal Imaging Assessment Report

INFRARED THERMAL IMAGING HEALTH REPORT

Multi-dimensional Dynamic Thermal Tomography

No. _____ Name _____ Sample Client
Gender _____ male _____ Age _____ 45
Date _____ 2026-06-15 09:57:09
Corp. _____ Quantiom Guardian Ministries · PMA 508(c)(1)(a)

The Cover Page

WHAT THE PAGE SHOWS

- ♦ Report title: Infrared Thermal Imaging Assessment Report — Multi-dimensional Dynamic Thermal Tomography
- ♦ Client information: Name, Gender, Age, Date and Time of assessment
- ♦ Practice/Clinic identification field

HOW TO READ IT

This is the orientation page. The phrase “Multi-dimensional Dynamic Thermal Tomography” is doing important work — it tells the client this is a multi-layered moment-in-time reading of the body, not a static snapshot. Confirm that the client’s information is correct before continuing.

TALKING POINTS FOR THE CLIENT

“What you are holding is a multi-dimensional reading of your body as it presented in the field today. It is a moment in time — your field will continue to shift, and we can read it again to track those shifts.”

Real-time Thermal Image of Body Function Status

Real-Time Thermal Image of Body Function Status

WHAT THE PAGE SHOWS

- ♦ Two large thermal images: front and back views of the upper body, captured at the moment of assessment
- ♦ Adjacent overlay images showing the body silhouette with color-coded regions — red zones indicating high temperature areas, blue zones indicating low.
- ♦ Temperature scale on the left side ranging from Heat Maximum (HM) through.

HOW TO READ IT

These are the foundational images everything else in the report is built from. The thermal images show the body's thermal field across the full assessed surface area.

The numerical deviation values next to each labeled region show how far that region deviates from the body's own thermal baseline.

TALKING POINTS FOR THE CLIENT

“These are the foundational images of your assessment. The colors represent your body's thermal field — where you are running warm, where you are running cool, and how those patterns are distributed across your body.”

Tips:

- Infrared thermal imaging technology is a functional imaging technology that passively receives human infrared thermal signals, without any radiation or harm to the human body. Pregnant women, lactating women, children, and the elderly can all undergo examination.
- This report uses infrared thermal imaging technology to detect temperature changes in various parts of the body. The platform uses dual AI core analysis of thermal characteristics and thermal morphology to conduct health assessments, aiming to help you understand your own health and sub-health status, as a reference for disease diagnosis and treatment.
- If you have a history of organ removal, the report indicates the risk of that organ, which

Lower Body & Full-Body Thermal Images

WHAT THE PAGE SHOWS

- Two large thermal images: front and back views of the lower body, captured at the moment of assessment
- Adjacent overlay images with the body silhouette and color-coded thermal regions for the lower body, including numerical deviation values
- A Tips section at the bottom explaining three important things about the assessment

HOW TO READ IT

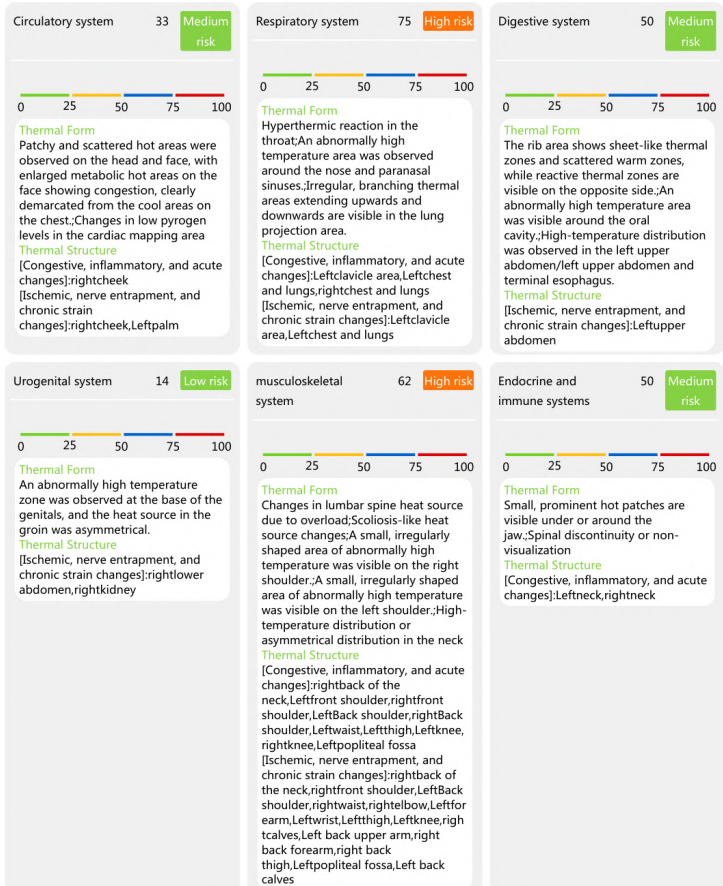

Tip one names that infrared thermal imaging is a non-invasive, non-radioactive, passive technology safe for all populations including pregnant women, lactating women, children, and the elderly

Tip two explains that the platform uses dual AI core analysis of thermal characteristics and thermal morphology to conduct the assessment

TALKING POINTS FOR THE CLIENT

“Your body has been read across the front, back, upper, and lower zones. This is non-contact, non-invasive, and completely safe — there is no radiation, no procedure, just the camera reading the heat your body is naturally emitting.”

represents abnormal tissue around that organ.

The Seven Body Systems Risk Assessment

WHAT THE PAGE SHOWS

- ♦ This is one of the most important pages in the entire report. It presents quantified risk-scored assessment across seven body systems, each with a.
- ♦ Circulatory System — the cardiovascular field architecture (heart, vascular tree, blood pressure regulation)
- ♦ Respiratory System — the breath and oxygenation field (lungs, throat.

HOW TO READ IT

Low Risk (0–33) — the system is reading as relatively coherent with manageable patterns. Worth attention, not alarm.

Medium Risk (34–66) — patterns of meaningful significance are showing. The system is asking for active integrative attention.

TALKING POINTS FOR THE CLIENT

“Your body is organized into seven primary system architectures, and the field is showing me how each one is functioning today.”

Thermal Image Findings

Circulatory system

Thermal Form

Patchy and scattered hot areas were observed on the head and face, with enlarged metabolic hot areas on the face showing congestion, clearly demarcated from the cool areas on the chest; Changes in low pyrogen levels in the cardiac mapping area

Thermal Structure

[Congestive, inflammatory, and acute changes]; right cheek

Respiratory system

Thermal Form

Hyperthermic reaction in the throat; An abnormally high temperature area was observed around the nose and paranasal sinuses; Irregular, branching thermal areas extending upwards and downwards are visible in the lung projection area.

Thermal Structure

[Congestive, inflammatory, and acute changes]; Left clavicle area, Left chest and

Digestive system

Thermal Form

The rib area shows sheet-like thermal zones and scattered warm zones, while reactive thermal zones are visible on the opposite side; An abnormally high temperature area was visible around the oral cavity; High-temperature distribution was observed in the left upper abdomen/left upper abdomen and terminal esophagus.

Urogenital system

Thermal Form

An abnormally high temperature zone was observed at the base of the genitals, and the heat source in the groin was asymmetrical.

Thermal Structure

[Ischemic, nerve entrapment, and chronic strain changes]; right lower abdomen, right kidney

musculoskeletal system

Thermal Form

Changes in lumbar spine heat source due to overload; Scoliosis-like heat source changes; A small, irregularly shaped area of abnormally high temperature was visible on the right shoulder; A small, irregularly shaped area of abnormally high temperature was visible on the left shoulder; High-temperature distribution or asymmetrical distribution in the neck

Endocrine and immune systems

Thermal Form

Small, prominent hot patches are visible under or around the jaw; Spinal discontinuity or non-visualization

Thermal Structure

[Congestive, inflammatory, and acute changes]; Left neck, right neck

other

Thermal Form

Sleep lines heat source seen on the forehead

Thermal Structure

Thermal Findings & Field Assessment Summary

WHAT THE PAGE SHOWS

- ♦ Page 6 consolidates the Thermal Form and Thermal Structure findings into a clean per-system summary
- ♦ Page 7 lists the top health pattern findings from the assessment, organized by system

HOW TO READ IT

These two pages function as the client's clinical summary – the at-a-glance distillation of what the assessment surfaced. Many clients will return to these pages again and again after the session, so it is worth spending real time here.

Sample Clientmale452026-06-15 09:57:09

Infrared Thermal Imaging Assessment Results

This assessment shows that you mainly have the following health disorders and disease risks.
Please further examine and take good self-care.

Circulatory system	Unstable blood pressure;Insufficient blood supply to the myocardium may
Respiratory system	Inflammatory reaction in the throat;Inflammatory changes in the nose (such as from a cold, sinusitis, or rhinitis);Increased lung markings or changes due to pyrogenic pneumonia
Digestive system	The liver is under heavy burden;Stomatitis/Periodontal inflammation;Inflammatory reaction in the stomach or esophagus and stomach
Urogenital system	Prostate metabolic abnormalities
musculoskeletal system	Changes in lumbar spine heat source due to overload;Scoliosis may;There is a possibility of inflammation in the right shoulder periarthritis.;There is a possibility of inflammation in the left shoulder periarthritis.;Neck muscle fatigue
Endocrine and immune systems	Submandibular lymphadenitis;Poor immunity
other	Poor sleep

Page 8

The Objective Heat Source Data Table

WHAT THE PAGE SHOWS

- ✦ A comprehensive temperature data table covering 32+ anatomical regions across head, trunk, and limbs
- ✦ For each region: Average Temperature, Low Temperature Area count, High Temperature Area count, and Whole Body Offset value
- ✦ Visual indicators (red up-arrows and blue down-arrows) marking regions with thermal abnormality

HOW TO READ IT

This is the most data-dense page of the entire report and the page that gives integrative physicians the strongest clinical confidence. It quantifies everything: which regions are running hot, which are running cold, how far each is from the body's own baseline, and how much abnormal-temperature.

Whole Body Offset — the difference between the high-temperature area of the region and the baseline.

TALKING POINTS FOR THE CLIENT

“What you are looking at here is the measured data behind everything we have been discussing. Every region of your body has been quantified — we have exact temperature readings for over thirty zones, with measurements of how much abnormal-temperature.”

Sample Client male 45 2026-06-15 09:57:09

↑ ↓ High Temperature Abnormality Low Temperature Abnormality

Temperature: Average Temperature

Low Temperature Area: Abnormal low temperature characteristic area of the part.

High Temperature Area: Abnormal high temperature characteristic area of the part.

Whole Body Offset: The difference between the high temperature area of the part and the basic temperature, the trend of changes before and after, that is, the quantification of curative effect. This indicator, together with the low temperature area and high temperature area, completes the efficacy comparison.

jaw Low Risk (Endocrine and immune systems) 2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description: Small, prominent hot patches are visible under or around the jaw.

●Tips: Submandibular lymphadenitis

Possible Symptoms:

Inflammation of the submandibular lymph nodes may be caused by a local infection, tonsillitis, or pharyngitis. If you experience pain, tenderness, and palpable mobility under one side of your jaw, which worsens when swallowing, followed by redness and heat in the affected area, please seek medical attention promptly to rule out any underlying medical conditions.

Health Suggestions:

1. Avoid spicy and stimulating foods and drinks, as these can exacerbate lymph node inflammation and lead to further deterioration. 2. Engage in at least 30 minutes of aerobic exercise daily. Moderate exercise can promote healthy development of the circulatory system and improve sleep quality. 3. Quit smoking and limit alcohol consumption, reduce stress, and maintain a good mood. 4. Get enough sleep, falling asleep before 11 PM and sleeping 7-8 hours each night.

The 17+ Individual Field Findings

WHAT THE PAGE SHOWS

- ✦ This is the longest section of the report and where the deepest clinical and field-medicine work happens.
- ✦ Finding name and risk classification (Low/Medium/High Risk)

Sample Clientmale452026-06-15 09:57:09

liverLow Risk (Digestive system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description: The rib area shows sheet-like thermal zones and scattered warm zones, while reactive thermal zones are visible on the opposite side.

●Tips: The liver is under heavy burden

Possible Symptoms:
The liver is a vital metabolic and detoxification organ. Overloading the liver without timely intervention can lead to impaired liver function, causing symptoms such as discomfort in the upper right abdomen, loss of appetite, and fatigue. If discomfort in the liver area persists, it is recommended to undergo liver ultrasound or a complete blood count to rule out any underlying medical conditions.

●Health Suggestions:
1. Liver-protective diet: Avoid overeating and late-night snacks. Consume red date drinks, hawthorn and schisandra drinks, and wolfberry leaf and pork liver soup. 2. Quit smoking and limit alcohol consumption, reduce stress, balance work and rest, and maintain a good mood. 3. Get enough sleep, avoid staying up late, and develop a habit of regularly resting your eyes. 4. Avoid prolonged sitting; engage in moderate aerobic and strength training to increase metabolism.

Page 11

throatLow Risk (Respiratory system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description: Hyperthermic reaction in the throat

●Tips: Inflammatory reaction in the throat

Possible Symptoms:
Pharyngitis is a common inflammation of the throat, which can be acute or chronic. It often occurs alongside symptoms of rhinitis and colds, as they are all upper respiratory tract infections. If you experience recurrent episodes, please seek medical attention promptly to prevent the condition from worsening.

●Health Suggestions:
1. Maintain a light diet, keep your mouth clean, and avoid smoking and alcohol. 2. Avoid exposure to dust, harmful gases, irritating foods, and environments with poor air quality. 3. Try to avoid contact with allergens that cause chronic allergic pharyngitis and avoid prolonged overuse of your voice. 4. It is recommended to undergo food allergy testing to identify the allergens.

Page 12

oral cavity

Low Risk (Digestive system)

2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:

An abnormally high temperature area was visible around the oral cavity.

●Tips:

Stomatitis/Periodontal inflammation

Possible Symptoms:

Common symptoms include bleeding gums, loose teeth, and mouth ulcers, all indicative of internal heat, leading to localized high temperatures. If these symptoms persist and recur, it may indicate digestive dysfunction due to spleen and stomach imbalances; in such cases, dietary and medicinal adjustments are recommended.

●Health Suggestions:

1. If you experience mouth ulcers, swelling, pain, or bad breath, it is recommended to use foods that clear heat and detoxify. 2. Eat more fruits and vegetables, less spicy and strongly flavored foods, maintain good oral hygiene, rinse your mouth frequently with diluted salt water, and abstain from smoking, alcohol, and betel nut. 3. It is recommended to focus on eating, chew thoroughly, and engage in light exercise after meals.

blood pressure

Low Risk (Circulatory system)

2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:

Patchy and scattered hot areas were observed on the head and face, with enlarged metabolic hot areas on the face showing congestion, clearly demarcated from the cool areas on the chest.

●Tips:

Unstable blood pressure

Possible Symptoms:

Unstable blood pressure may indicate the risk of either high or low blood pressure. If you experience symptoms such as dizziness, headache, stiff neck, fatigue, palpitations, or blurred vision, measure your blood pressure promptly to stay informed about your health.

●Health Suggestions:

1. Monitor your blood pressure regularly. Normal blood pressure range: systolic pressure 90mmHg-140mmHg, diastolic pressure 60mmHg-90mmHg. 2. Follow a low-sodium, low-salt diet, eat more light foods, fruits, and vegetables. 3. Quit smoking and drinking alcohol, avoid staying up late, reduce anger, and maintain a positive mood. 4. Take walks regularly and engage in moderate exercise. 5. It is recommended to have a comprehensive health check-up at a reputable medical institution.

Page 14

nozeLow Risk (Respiratory system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:

An abnormally high temperature area was observed around the nose and paranasal sinuses.

●Tips:

Inflammatory changes in the nose (such as from a cold, sinusitis, or rhinitis)

Possible Symptoms:

Rhinitis refers to inflammation of the nasal mucosa caused by various reasons. The main symptoms include nasal congestion, runny nose, sneezing, decreased sense of smell, snoring, and in severe cases, headache and dizziness. Chronic sinusitis often manifests as a feeling of heaviness in the head.

●Health Suggestions:

1. Maintain good indoor air circulation, minimize contact with and inhalation of harmful substances, and avoid exposure to smoke, dust, and allergens; try to avoid crowded places and wear a mask. 2. Exercise regularly, pay attention to weather changes, and adjust clothing accordingly. 3. Avoid raw, cold, spicy, and stimulating foods; improve nutritional status and eat more foods rich in vitamins A and B. 4. It is recommended to undergo food allergy testing.

Detection Thermal Image

●Heat Source Description:

Changes in low pyrogen levels in the cardiac mapping area

●Tips:

Insufficient blood supply to the myocardium may

Possible Symptoms:

When the heart itself does not receive enough blood, it can lead to myocardial hypoxia, weakened heart function, and harm to health. It is recommended to see a doctor promptly for examination to rule out any underlying medical risks.

●Health Suggestions:

1. If you experience dull pain behind the sternum or in the precordial region, radiating to the left shoulder and left upper arm, during fatigue or mental stress, lasting 3 to 5 minutes and subsiding on its own after rest, or if you experience chest tightness, palpitations, or shortness of breath during physical activity that subsides with rest, please seek medical attention promptly. 2. Reduce your intake of high-fat foods and increase your consumption of fruits, vegetables, and soy products. Quit smoking and limit alcohol consumption. 3. Engage in moderate-to-low intensity physical activity; pay attention to work-rest balance, avoid staying up late, ensure adequate sleep, and maintain a positive mood. 4. Consider appropriate physical therapy to promote blood circulation, relax muscles, promote metabolism, and accelerate blood circulation.

stomachLow Risk (Digestive system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:High-temperature distribution was observed in the left upper abdomen/left upper abdomen and terminal esophagus.

●Tips:Inflammatory reaction in the stomach or esophagus and stomach

Possible Symptoms:
Common symptoms of gastritis include upper abdominal pain, bloating, belching, recurrent bleeding, loss of appetite, acid reflux, nausea, vomiting, fatigue, constipation, or diarrhea. If you experience persistent discomfort, it is recommended to have a gastroscopy or other gastrointestinal tests to rule out any underlying medical conditions.

●Health Suggestions:
1. Maintain a diverse diet, avoiding picky eating. Consume at least 12 different foods daily and at least 25 different foods weekly. 2. Eat in moderation, avoiding overeating. Eat smaller, more frequent meals, and choose easily digestible, soft foods. 3. Avoid spicy, hot, and strong alcoholic beverages to prevent stomach ulcers. 4. Eat regularly, and never skip breakfast or have late-night snacks.

lungLow Risk (Respiratory system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:Irregular, branching thermal areas extending upwards and downwards are visible in the lung projection area.

●Tips:Increased lung markings or changes due to pyrogenic pneumonia

Possible Symptoms:
Bronchitis is mainly caused by viral and bacterial infections. External factors such as decreased temperature, smoke, dust, air pollution, and allergies can trigger the disease. Diagnosis can be made through lung auscultation, blood tests, and chest X-rays.

●Health Suggestions:
1. If you experience recurring cough, phlegm, wheezing, or respiratory infections, please seek medical attention promptly. 2. Quit smoking and drinking alcohol, avoid secondhand smoke, and avoid staying up late. 3. Avoid irritating your respiratory tract with smoke, dust, and allergens. 4. Eat plenty of fruits and vegetables, and a light diet; avoid spicy, hot, oily, and greasy foods. 5. It is recommended to undergo food allergy testing.

Sleep stateLow Risk (other)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:Sleep lines heat source seen on the forehead

●Tips:Poor sleep

Possible Symptoms:
If you frequently experience poor sleep, vivid dreams, and frequent awakenings, and feel tired or lacking energy upon waking, but have no other serious health issues, it is recommended to seek treatment through Traditional Chinese Medicine to regulate your constitution.

●Health Suggestions:
1. Maintain a balanced diet, eat plenty of fruits and vegetables, and consume oils rich in unsaturated fatty acids such as flaxseed oil, olive oil, and camellia oil daily. Also, eat 25g of nuts daily. 2. Engage in moderate exercise, aiming for at least 30 minutes of aerobic exercise daily, such as jogging, walking, or swimming, 3-5 times per week. 3. Quit smoking and limit alcohol consumption. It's recommended to drink green tea during the day and avoid tea and coffee at night. 4. Manage stress, practice deep breathing, maintain a positive mood, and participate in yoga, meditation, or mindfulness activities. 5. Go to bed early and wake up early. For those with sleep problems, soak your feet in traditional Chinese medicine and drink a glass of warm milk half an hour before bed. Ensure 7-8 hours of sleep daily.

ImmunityLow Risk (Endocrine and immune systems)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:Spinal discontinuity or non-visualization

●Tips:Poor immunity

Possible Symptoms:
If you are prone to colds, fevers, infections, etc., and still feel tired and fatigued despite getting enough sleep, it is recommended to seek treatment from a traditional Chinese medicine practitioner.

●Health Suggestions:
1Pay attention to developing a healthy lifestyle, including a balanced diet, moderate exercise, quitting smoking and limiting alcohol consumption, and getting enough sleep. 2If you have no other underlying medical conditions and experience cold symptoms such as runny nose, nasal congestion, sneezing, and body aches but no fever, rest appropriately and drink plenty of warm water to activate your immune system and improve your immunity.

waistLow Risk (musculoskeletal system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:Changes in lumbar spine heat source due to overload

●Tips:Changes in lumbar spine heat source due to overload

Possible Symptoms:

Long-term, repetitive, excessive lower back movements and overloading, such as prolonged sitting, standing, or lifting heavy objects from a bent-over position to an upright position, can keep the lower back muscles in a state of high tension for a long time, which can eventually lead to chronic lower back strain.

●Health Suggestions:

1. Pay attention to your posture and avoid staying in one position for too long; avoid sitting on soft chairs, sofas, and sleeping on soft beds, and instead sleep on a firm mattress. 2. Keep your lower back warm and avoid direct exposure to fans or air conditioning to prevent catching a cold. 3. Perform appropriate exercises to strengthen your back muscles, or use local massage or physical therapy to relieve symptoms. 4. Supplement with calcium products as needed. Eat more milk, eggs, soy products, vegetables, and fruits.

spineLow Risk (musculoskeletal system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:Scoliosis-like heat source changes

●Tips:Scoliosis may

Possible Symptoms:

If you have scoliosis, it is recommended to go to the hospital for examination and treatment in time. If the inside of the sole of your shoe is severely worn, it is recommended to go to the sports medicine department or rehabilitation department for rehabilitation assessment.

●Health Suggestions:

1. Pay attention to keeping warm in daily life and combine work with rest; 2. Avoid bad postures such as crossing your legs, sitting or standing for long periods of time, carrying a single-shoulder bag, and slouching on the sofa.

Page 22

Sample Clientmale452026-06-15 09:57:09

shoulder Low Risk (musculoskeletal system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description: A small, irregularly shaped area of abnormally high temperature was visible on the right shoulder.

●Tips: There is a possibility of inflammation in the right shoulder periarthritits.

Possible Symptoms:

Frozen shoulder, also known as adhesive capsulitis, is a common condition characterized by shoulder pain and limited range of motion, which usually worsens at night. It commonly occurs around the age of 50 and is also called "fifty-year-old shoulder" or "frozen shoulder." The incidence rate is slightly higher in women than in men. The general recovery period for frozen shoulder is 5-6 months, but can be as long as 1-2 years. In rare cases, it can even lead to lifelong impairment of shoulder joint function.

●Health Suggestions:

1. Pay attention to keeping warm and avoid prolonged exposure to air conditioning to prevent your shoulders from getting cold. In winter, wear small shoulder covers for protection and warmth, and use shoulder covers to keep warm while sleeping. 2. Apply a heat pack before exercising, and a cold pack after exercising in winter and an ice pack in summer for 10-20 minutes. 3. Strengthen functional exercises, focusing on shoulder joint mobility, such as wall climbing exercises, parallel bar exercises, horizontal bar exercises, and rotating exercises in the fitness area.

neckLow Risk (musculoskeletal system)2026-06-15 09:57:09

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:High-temperature distribution or asymmetrical distribution in the neck

●Tips:Neck muscle fatigue

Possible Symptoms:
Neck muscle fatigue refers to symptoms such as neck pain, stiffness, and limited range of motion caused by poor posture, exposure to cold, or other factors. If left untreated, it can easily lead to cervical spondylosis.

●Health Suggestions:
1. To prevent neck muscle fatigue, avoid maintaining a single posture for extended periods to prevent neck strain from overextension. Ideally, take a 5-10 minute break after every hour of continuous work.
2. Keep your neck warm, avoiding direct exposure to fans or air conditioning to prevent catching a cold.
3. Strengthen your neck with exercises. Perform slow flexion, extension, and rotation of the neck, or cross your fingers over your neck and perform resistance exercises.

Page 25

Reference Thermal Image

Detection Thermal Image

●Heat Source Description:An abnormally high temperature zone was observed at the base of the genitals, and the heat source in the groin was asymmetrical.

●Tips:Prostate metabolic abnormalities

Possible Symptoms:
The prostate is closely related to male reproductive and urinary functions. Abnormal prostate metabolism may lead to problems such as difficulty urinating and reduced sperm motility. If you experience symptoms such as frequent urination, urgency, painful urination, hematuria, difficulty urinating, urinary incontinence, split urine stream, post-void dribbling, increased nocturia, or white discharge after urination or defecation, please seek medical attention promptly to rule out any underlying medical conditions.

●Health Suggestions:
1. Develop good eating habits and avoid caffeine, spicy foods, alcohol, and other stimulating foods. Eat more tomatoes, carrots, apples, pumpkin seeds, nuts, and zinc-rich foods. 2. Drink plenty of water and keep urination regular; do not hold your urine, avoid prolonged sitting, and do not wear tight underwear, as this can affect local blood circulation. 3. Quit smoking and limit alcohol consumption. Maintain a regular lifestyle, reduce mental stress, and avoid excessive fatigue; moderate sexual activity and maintain regular bowel movements. 4. Warm sitz baths can relieve tension and pressure on the prostate and reduce discomfort. 5. If symptoms are significant and affect daily life, further examination or treatment by a specialist is recommended, and regular follow-up examinations are advised.

Assessment Date:2026-06-15

The above are possibilities indicated by the thermal image. Please consult clinical examination for further diagnosis.

Cover, Directory & Real-Time Meridian Imaging

WHAT THE PAGE SHOWS

- ♦ Page 1: Report cover with client information and the title “Infrared Thermal Image · Field Medicine Visualization”
- ♦ Page 2: Directory listing all sections of the report, with three important practitioner notes at the bottom about factors that may affect the.
- ♦ Page 3: Six thermal images displaying the body’s real-time meridian and.

HOW TO READ IT

Symmetry values are reported by region (clavicle, front shoulder, chest and lungs, back, kidney, hip, buttocks). Values closer to 1.0 indicate strong symmetry; values further from 1.0 indicate field asymmetry.

Regularity values describe whether the thermal sequence across regions follows expected patterns (“good regularity”) or shows irregular sequence patterns.

TALKING POINTS FOR THE CLIENT

“This page is reading your body across the meridian architecture — the energetic channels that carry vital flow through the body. We are looking at how symmetrical and how regular your field flow is.”

Sample Clientmale452026-06-15 09:57:12

1. Drinking alcohol, taking vasodilator drugs or chemotherapy drugs, sweating, high fever, insufficient balancing time, and non-standard scanning posture will affect the syndrome element evaluation score to varying degrees.

2. Scanning results under different environmental temperatures and humidity will vary slightly.

3. For subjects with surgical organ removal, the examination results and syndrome element evaluation of the relevant parts are not for reference.

Page 2

Sample Clientmale452026-06-15 09:57:12

Real-time Thermal Image of TCM Meridians and Acupoints

Thermal Distribution

Symmetry	front : about clavicle area asymmetry 0.71、about front shoulder asymmetry 0.70、about chest and lungs asymmetry 0.73 back: about back asymmetry 0.72、about kidney asymmetry 0.74、about Hip asymmetry 0.52、about buttocks asymmetry 0.59
Regularity	Positive hot sequence : Leftfront、rightfront、Leftclavicle area、Leftfront shoulder、rightfront shoulder Backside hot sequence : good regularity

The normal human body temperature distribution has a certain stability and characteristic, different parts of the body have different temperatures, forming different thermal fields. When disease or functional changes occur in a certain part of the human body, the blood flow in that area will change accordingly, leading to local temperature changes. Some temperatures increase, some decrease. Infrared thermal imaging technology can clearly, accurately and timely detect tiny temperature changes in human tissues.

Page 3

Sample Clientmale452026-06-15 09:57:12

TCM Constitution

Constitution Identification Syndrome	Yangming is not in harmony, and his mind is restless. : The Yangming meridian travels through the head region, causing partial high fever.;Lower abdominal coldness and deficiency of kidney yang : The lower abdomen area is cold, interspersed with isolated heat sources in the lower abdomen and bottom.;Insufficient Yang Qi in the Heart and Obstructed Heart Vessels : The heart area is cold and clumpy due to heat loss.;Du meridian blocked, Yang energy weak : The Du meridian may be intermittent or not visible, or appear cold and deviated.
Constitution	Yang deficiency constitution, damp-heat constitution

Constitution phenomenon is an important manifestation of human life activities, referring to the comprehensive and relatively stable inherent characteristics of morphological structure, physiological function and psychological state formed in the process of human life based on innate endowment and acquired foundation. It is the human individual characteristic formed in the process of growth and development that adapts to the natural and social environment. TCM constitution science takes the individual human being as the research starting point, aiming to study different constitution composition characteristics, evolution rules, influencing factors, classification standards, so as to apply them to guide disease prevention, diagnosis, treatment, rehabilitation and health preservation.

Facial Reflex Zone

Part	Temperature	Part	Temperature	Part	Temperature
First face area	34.40	throat area	34.58	Heart area	34.32
lung area	34.51	liver area	34.63	Stomach area	34.27
Spleen area	34.27	Large intestine area	34.23	Small intestine area	34.41
bladder	33.67	Kidney area	33.63		

TRADITIONAL FIELD MEDICINE REPORT · PAGE 4 OF 20

Field Constitution Identification · Nine Constitutions

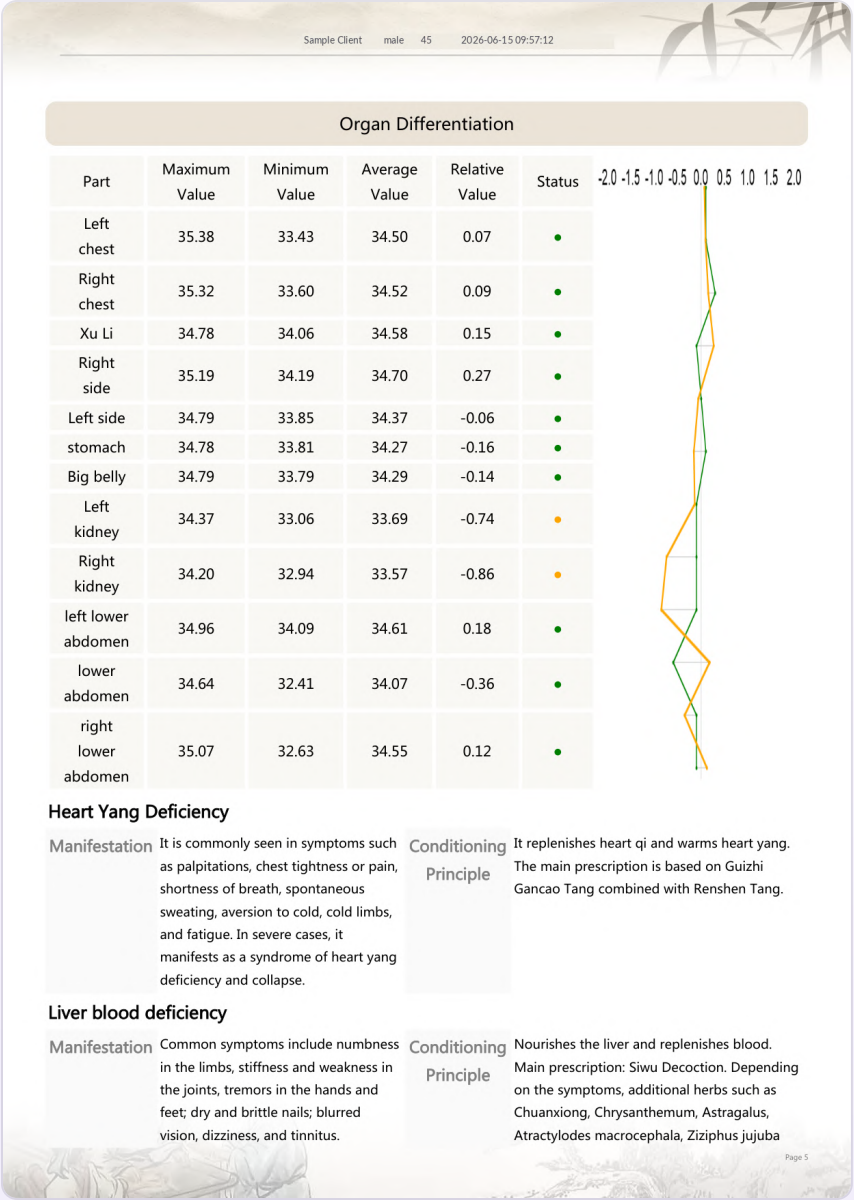

WHAT THE PAGE SHOWS

- Constitution Identification Syndrome — the energetic patterns the field is showing (e.g., Yangming meridian disharmony, lower abdominal coldness and.
- Constitution — the client’s identified constitution archetype from the Nine Constitutions framework (e.g., Yang deficiency constitution, damp-heat.

HOW TO READ IT

The face is a microcosm of the body — specific facial zones correspond to specific organ systems. The report measures the temperature of each zone, allowing the practitioner to see at a glance which organ systems are running warmer or cooler than baseline.

First face area, throat area — upper warmer zone of the face

Organ Field Differentiation

WHAT THE PAGE SHOWS

- ✦ A 12-region organ differentiation table with maximum, minimum, average, and relative temperature values
- ✦ A visual deviation chart on the right showing graphical representation of each region's thermal status
- ✦ Identified organ-level field patterns (e.g., Heart Yang Deficiency, Liver Blood Deficiency, Kidney Yang Deficiency)

TALKING POINTS FOR THE CLIENT

“Your field is currently presenting in the [name] channel. What this tells us is the depth at which your body is processing what it is navigating. [Translation]. This is not a permanent designation – your channel can shift as the field shifts.”

Sample Client male 45 2026-06-15 09:57:12		see, <i>Polygonum multiflorum</i> , and pearl powder may be added.	
Kidney Yang Deficiency			
Manifestation	Common symptoms include aversion to cold, cold limbs, cold pain in the lower back, weakness in muscles and bones, pale or dark complexion, fatigue, dizziness, tinnitus, and frequent urination at night.	Conditioning Principle	This formula warms and tonifies kidney yang, replenishing kidney essence. The main prescription is based on Jin Kui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet), and you may also consume foods such as mutton and sea cucumber.
Six Channel Identification			
Six Channel Differentiation Conclusion:Taiyin syndrome Six Channel Constitution Conclusion:Taiyin-Yang deficiency constitution Related Constitution:Yang deficiency constitution Common Manifestation Description:Deficiency of spleen-yang leads to yang deficiency, which cannot warm the whole body. There is deficiency-cold in the middle energizer, and the ascending and descending functions of the spleen and stomach are abnormal. Common manifestations include abdominal fullness with vomiting, diarrhea, intolerance to cold foods, and abdominal pain. Infrared Description:The infrared trajectory of the Governor Vessel is intermittent; the hot areas on the abdomen show a relative cold deviation; the kidneys, middle energizer, lower energizer, and palms exhibit a relative cold deviation distribution			
Triple Energizer Analysis			

The Three Sovereign Cauldrons

WHAT THE PAGE SHOWS

- ♦ A body diagram showing three regions: Upper Cauldron (chest), Middle Cauldron (abdomen), Lower Cauldron (lower abdomen and pelvis)
- ♦ Deviation index values for each cauldron (Upper, Middle, Lower)
- ♦ Status indicators: Normal Status, Heat Deviation, or Cold Deviation

HOW TO READ IT

A value of 0.0 is normal/balanced

Positive values (e.g., +0.1, +0.3) indicate heat deviation — the cauldron is running warmer than baseline

TALKING POINTS FOR THE CLIENT

“Your body has three foundational metabolic cauldrons — the upper one holding your heart and lung field, the middle one holding your digestive field, and the lower one holding your foundational vitality and elimination.”

The Twelve Meridians & Acupoint Blockage

WHAT THE PAGE SHOWS

- ✦ This is one of the most detailed and clinically valuable sections of the entire report.
- ✦ An anatomical illustration showing the meridian's pathway through the body
- ✦ A graph showing the thermal activity along the meridian, with reference value, left side, and right side traces

Vital Energy & Blood Stagnation Mapping

WHAT THE PAGE SHOWS

- ✦ Qi (Vital Energy) and Blood Stagnation mapping by anatomical region, with quantified intensity values
- ✦ Qi and Blood Deficiency mapping by anatomical region, with quantified intensity values

HOW TO READ IT

Each region shows a numerical intensity value (e.g., “right cheek [56]” or “Left upper abdomen [2090]”). Higher numbers indicate stronger pattern intensity. The largest values often point to the most clinically and energetically significant patterns to address.

TALKING POINTS FOR THE CLIENT

“What we are looking at here is where your vital energy and blood are stagnating versus where they are depleted. Stagnation means the flow is obstructed — there is movement but it is congested.”

jaw

Small, prominent hot patches are visible under or around the jaw. , Submandibular lymphadenitis

liver

The rib area shows sheet-like thermal zones and scattered warm zones, while reactive thermal zones are visible on the opposite side. , The liver is under heavy burden

throat

Hyperthermic reaction in the throat , Inflammatory reaction in the throat

oral cavity

An abnormally high temperature area was visible around the oral cavity. , Stomatitis/Periodontal inflammation

blood pressure

Patchy and scattered hot areas were observed on the head and face, with enlarged metabolic hot areas on the face showing congestion, clearly demarcated from the cool areas on the chest. , Unstable blood pressure

nose

An abnormally high temperature area was observed around the nose and paranasal sinuses. , Inflammatory changes in the nose (such as from a cold, sinusitis, or rhinitis)

Conditioning Suggestions

Heart Yang Deficiency

The treatment principle is to warm and tonify the heart yang, replenish qi and unblock the meridians. It uses pungent and sweet herbs to transform yang, invigorate the heart yang, and is supplemented with calming herbs.

Herbal Prescription

1. Guizhi Gancao
Tang/Baoyuan Tang • Guizhi Gancao Tang Composition: Cinnamon twig (warms and invigorates heart yang), prepared licorice root (tonifies qi and restores pulse). • Baoyuan Tang Composition: Ginseng, Astragalus, Licorice root, Cinnamon bark (tonifies qi and warms yang). • Efficacy: Warms and tonifies heart yang. Indications: Insufficient heart yang, palpitations, chest tightness, shortness of breath, aversion to cold, and cold limbs. • Modifications: Chest tightness and pain → Add Trichosanthes fruit and Allium macrostemon; Edema → Add Poria and Polyporus umbellatus.

Acupoint Conditioning

1. Moxibustion/Warm Needle Acupuncture Points: • Xinchu (1.5 cun lateral to the spinous process of the 5th thoracic vertebra): Warms and unblocks the heart yang. • Jueyinshu (1.5 cun lateral to the spinous process of the 4th thoracic vertebra): Relieves chest tightness and regulates qi. • Neiguan (PC6): Calms the heart and unblocks the meridians. • Tanzhong (on the anterior midline, level with the 4th intercostal space): Meeting point of qi, relieves chest tightness and regulates qi.

Food Therapy

1. Foods to warm and nourish the heart's yang: • Cinnamon, dried ginger, red dates, longan, and mutton. 2. Dietary therapy recipes: • Longan and red date tea: Steep 10 longans and 5 red dates in hot water to make tea. • Codonopsis and astragalus stewed chicken: Stew 15g of codonopsis, 15g of astragalus, and 200g of chicken. This tonifies qi and strengthens yang.

Daily Care Notes

1. Dietary Restrictions: • Avoid raw, cold, and cooling foods. Control salt intake to prevent water retention. 2. Exercise and Rest: • Engage in moderate activity, such as walking, but avoid strenuous exercise that increases the burden on the heart. Ensure sufficient rest and avoid staying up late. 3. Emotions and Warmth: • Maintain a peaceful mood and avoid extreme joy or sorrow. Pay attention to keeping warm, especially the chest and back.

TRADITIONAL FIELD MEDICINE REPORT · PAGE 17 OF 20

Conditioning Suggestions

WHAT THE PAGE SHOWS

- ♦ For each identified organ-level field pattern (Heart Yang Deficiency, Liver Blood Deficiency, Kidney Yang Deficiency, etc.), four integrated pillars.
- ♦ Herbal Prescription — specific traditional botanical formulas with composition, efficacy, indications, and modifications based on presentation

Sample Clientmale452026-06-15 09:57:12

Liver blood deficiency

The treatment principle is to nourish liver blood and soften liver yin, supplemented by strengthening the spleen and replenishing qi, so as to provide the source of qi and blood production.

Herbal Prescription

1. Siwu Decoction • Composition: Rehmannia glutinosa (nourishes yin and replenishes blood), Angelica sinensis (replenishes blood and invigorates blood), Paeonia lactiflora (nourishes blood and softens the liver), Ligusticum chuansiong (invigorates blood and promotes qi circulation). • Efficacy: Replenishes and harmonizes blood. Indications: Blood deficiency with heat → Replace Rehmannia glutinosa with raw Rehmannia glutinosa, add Scutellaria baicalensis and Paeonia suffruticosa; Insomnia with excessive dreaming → Add Ziziphus jujuba var. spinosa and Polygonum multiflorum.

Acupoint Conditioning

1. Main acupoints for acupuncture (tonifying method): • Liver Shu (1.5 cun lateral to the spinous process of the 9th thoracic vertebra): Tonifies liver blood. • Spleen Shu (1.5 cun lateral to the spinous process of the 11th thoracic vertebra): Strengthens the spleen and generates blood. • Sanyinjiao (3 cun above the tip of the medial malleolus): Regulates and tonifies the three Yin meridians of the liver, spleen, and kidney. • Zusanli (ST36): Tonifies Qi and nourishes blood.

Food Therapy

1. Foods for nourishing blood and liver: • Pork liver, chicken liver, spinach, mulberries, black sesame seeds, red dates, longan, and goji berries. 2. Dietary therapy recipes: • Angelica and ginger mutton soup: Warms the meridians and nourishes blood. • Spinach and pork liver soup: 100g spinach, 50g pork liver, boiled into a soup. Nourishes blood and improves eyesight.

Daily Care Notes

1. Dietary Restrictions: • Limit spicy, warming, and drying foods that damage yin and deplete blood. Avoid excessive dieting. 2. Exercise and Rest: • Avoid strenuous exercise and overexertion that deplete qi and blood. Ensure sufficient sleep, going to bed before 11 PM to nourish liver blood. 3. Emotions and Eye Use: • Maintain emotional stability and avoid anger that damages the liver. Reduce prolonged eye use (such as looking at mobile phones and computers), as prolonged visual strain damages blood.

Page 18

Sample Clientmale452026-06-15 09:57:12

Kidney Yang Deficiency

The fundamental principle is to warm and tonify kidney yang, replenish essence and marrow, "invigorate the source of fire to dispel yin stagnation," supplemented by astringent and consolidating herbs.

Herbal Prescription

1. **Jinkui Shenqi Wan (Kidney Qi Pill from the Golden Cabinet)** • Composition: Aconite, Cinnamon Twig, Rehmannia Root, Cornus Fruit, Dioscorea Rhizome, Moutan Bark, Poria Cocos, Alisma Rhizome (Warms and tonifies kidney yang, promotes qi circulation and water metabolism). • Efficacy: Treats kidney yang deficiency, lower back and knee weakness, aversion to cold and cold limbs, frequent or difficult urination, impotence and premature ejaculation, etc. 2. **Yougui Wan (Right-Restoring Pill)** • Composition: Aconite, Cinnamon Twig, Rehmannia Root, Dioscorea Rhizome, Cornus Fruit, Lycium Fruit, Cuscuta Seed, Deer Antler Glue, Angelica Root, Eucommia Bark (Warms and tonifies kidney yang, replenishes essence and blood).

Acupoint Conditioning

1. Moxibustion at key acupoints: • Mingmen (below the spinous process of the second lumbar vertebra): Warms and tonifies kidney yang, strengthens the waist and knees. • Shenshu (1.5 cun lateral to the spinous process of the second lumbar vertebra): Benefits the kidneys and assists yang. • Guanyuan and Qihai: Warms and tonifies the lower abdomen. 2. Acupuncture (tonifying method): • Taixi (the original acupoint of the kidney meridian), Yongquan.

Food Therapy

1. Foods that warm and tonify kidney yang: • Leeks, walnuts, chestnuts, mutton, shrimp, sea cucumber, cinnamon. 2. Dietary therapy recipes: • Stir-fried shrimp with walnuts and leeks: warms the kidneys and invigorates yang. • Stewed mutton with cinnamon: 250g mutton, 3g cinnamon, stewed and consumed.

Daily Care Notes

1. Dietary Restrictions: • Avoid all raw, cold, and cooling foods and drinks. Limit consumption of cold-natured fruits. 2. Exercise and Rest: • Engage in gentle, warming exercises such as jogging or Baduanjin (Eight Pieces of Brocade). Go to bed early and rise late in winter, avoiding cold and staying warm. Regularly soak your feet in hot water. 3. Emotions and Warmth: • Avoid fear as it can harm the kidneys. Pay special attention to keeping your lower back and feet warm.

Sample Clientmale452026-06-15 09:57:12

Yang deficiency constitution

Insufficient Yang energy manifests as aversion to cold, cold hands and feet. Treatment should focus on warming and replenishing Yang energy and dispelling internal cold, with an emphasis on tonifying the kidneys and strengthening the spleen.

Herbal Prescription

1. Xiaojianzhong Granules

- Composition: White peony, jujube, cinnamon twig, roasted licorice, ginger, and maltose.
- Efficacy: It can warm the middle energizer, replenish deficiency, and alleviate pain.

2. Jinkui Shenqi Pills

- Composition: Rehmannia glutinosa, yam, cornus officinalis (processed with wine), poria cocos, paeonia suffruticosa, alismatis rhizoma, cassia bark, and aconite.
- Efficacy: Warm and replenish kidney-yang, transform qi and promote water metabolism.

3. Shenfu Qiangxin Pill

- Composition: Ginseng, prepared aconite, mulberry bark, polyporus umbellatus, semen descurainiae, and rhubarb.
- Efficacy: nourishing qi and boosting yang, strengthening the heart and promoting diuresis.

Acupoint Conditioning

1. Commonly used moxa stick moxibustion at Shenque, Mingmen, Guanyuan, Zhongwan, and Zusanli points can help regulate symptoms of yang deficiency. It is recommended to perform the moxibustion two to four times a week, with each point being treated for 10 to 15 minutes.

2. Acupoints selected based on the disease:

For lethargy, prescribe Baihui (Du 20) and Dazhui (Du 14);

For diarrhea and constipation, use acupoints Tianshu, Zhongwan, and Zusanli;

Palpitations are treated with acupuncture at Xinshu (BL 15) and Shenmen (HT 7);

For urinary retention, acupunct Guanyuan (CV 4), Zhongji (CV 6), and Pangguangshu (BL 25) points;

Edema is treated with Sanjiao Shu, Shuifen, and Guanyuan;

For impotence, combine with Zhongji (CV 4) and Sanyinjiao (SP 6).

Food Therapy

Avoid: Limit consumption of cooling foods such as bananas, grapes, chrysanthemums, and mung beans. Avoid raw, cold, and cooling foods such as bitter melon, duck, crab, and cold drinks. Suitable: Eat warming foods such as beef and mutton, leeks, ginger, walnuts, dates, and black sesame seeds.

Recommended medicinal diets: • Astragalus and Cuscuta Porridge: Ingredients include astragalus, yam, cuscuta, and japonica rice. Benefits: Warms the body, invigorates yang, strengthens the spleen and stomach, and calms the mind. • Mutton and Japonica Rice Porridge: Ingredients include japonica rice, goji berries, and mutton. Benefits: Warms the middle jiao, nourishes blood, dispels cold, and relieves pain.

Daily Care Notes

- Daily Life: In winter, avoid the cold and stay warm; in spring and summer, nourish Yang energy and sunbathe frequently. In summer, do not sleep outdoors, and avoid sleeping directly in front of fans or excessively cold air conditioning. Avoid prolonged stays in shady areas, pavilions, or drafty passageways. Pay attention to keeping your feet, back, and lower abdomen warm.
- Exercise: Movement generates Yang energy; engage in physical exercise 1-2 times daily. Gentle and soothing exercises are recommended, such as walking, jogging, Tai Chi, Five Animal Frolics, and Eight Pieces of Brocade.
- Emotional State: Maintain a calm and focused mind, be cheerful and optimistic, and have a positive outlook.

Assessment Date:2026-06-15

This report is only valid for the infrared thermal image taken this time. It only indicates the possibility of health risks represented by temperature anomalies and cannot replace clinical diagnosis. The actual situation shall be subject to the diagnosis of medical institutions.

Page 20

COMPARISON MODE

See the healing journey unfold.

Comparison Mode places up to six thermal images side by side across weeks, months, and years — validated visualization of how integrative protocols measurably move the body's thermal field.

"The conversation shifts from do you feel better? to look at how your field has shifted."

SECTION 03

Quantum Field Medicine Technology

The Quantiom Vault integration — where measured thermal data becomes the foundation layer for personalized energetic recalibration.

Braiding the energetic *and the measured.*

The category serves both Vault members working purely energetically and those with a Field Medicine Reader assessment in hand. No member is excluded — the device simply opens a deeper doorway.

Layer One

Independent Energetic Transmissions

Sovereign Vault transmissions flowing purely from the energetic standpoint — complete, standalone, and accessible to all Vault members regardless of device access.

♦ Available to all Vault members

Layer Two

Integrated Diagnostic Report Upload

Practitioners upload the client's assessment into the Vault. The Sovereign Source Intelligence reads the thermal findings, meridian blockages, constitution patterns and organ differentiation — and uses this real measured data to personalize.

♦ Unlocked by the Field Medicine Reader

Request a sample [Quantiom Vault transmission report](mailto:info@quantiom.org) at info@quantiom.org · [Quantiom.Earth](https://www.quantiom.org)

WHAT BECOMES POSSIBLE

Not generic. *Calibrated to this field.*

The Report Reveals

Exact meridian blockages — CV6/CV5 · LR14-5

Organ patterns — Heart / Kidney Yang deficiency

Constitution patterns — Yang deficiency · damp-heat

17 common thermal findings named directly

The Transmission Responds

Recalibration targeting the exact blocked meridians

Transmissions tuned to the flagged organ patterns

Biofield work addressing the named constitution

Time-series tracking confirms the energetic shift

25-45 pages — each Quantiom Vault recalibration report, streamed directly into the quantum field stream.

THE INDEPENDENT LAYER

Twelve foundational *transmissions*.

01

Multi-System Field Coherence

02

Nine Constitutions Recalibration

03

Twelve Meridians Restoration

04

Triple Energizer Alignment

05

Qi & Blood Sovereign Flow

06

Facial Reflex Zones Recalibration

07

Six Channel Restoration

08

Yang Restoration

09

Yin Restoration

10

Spine & Musculoskeletal Field

11

Immunity & Sleep Coherence

12

Inverted Spectrum Mirror ★

ROLLING OUT IN THREE PHASES · YEAR ONE · PHASE 1 FOUNDATION · PHASE 2 DEEP WORK ·
PHASE 3 COMPLETION

From a single session *to a living record.*

1

Assess

Practitioner conducts the Field Medicine Reader session.

2

Upload

Report PDF or key findings entered into the Vault category.

3

Analyze

Sovereign Source Intelligence extracts findings and cross-references the paradigm.

4

Personalize

A transmission calibrated to the exact measured field is generated.

5

Track

Re-uploads chart measurable shifts alongside the energetic work.

SECTION 04

Why This Is Different

Other thermography devices exist. None converge what this one brings together.

THE CONVERGENCE OF SEVEN ELEMENTS

What sets the Field Medicine Reader *apart*.

01

Multi-Paradigm Reporting

Western, TCM, six-channel, energizer, meridian, and facial reports from one session.

02

Sovereign Positioning

Freedom to work in the integrative paradigm — freedom within integrity.

03

Quantiom Vault Integration

Reports feed a multidimensional living healing system, not a static file.

04

Inverted Spectrum Paradigm

The first deployable instrument of a sovereign healing framework.

05

Guardian Practitioner Network

Shared protocols, training, peer consultation, and community.

06

Time-Series Tracking

Demonstrate measurable change — a retention tool few modalities can match.

07

Sustainable Economics

Comprehensive reports at sub-\$2 variable cost — accessible exchange, healthy margins.

"Not a tool — a doorway into the paradigm."

WHO IT IS FOR

Across every *paradigm of care.*

Guardian Practitioners of the Quantiom Vault

Integrative physicians — MDs, DOs, NDs, DCs, LAcS

TCM & acupuncture practitioners

Functional medicine & sovereign healing practitioners

Wellness clinics, retreat & sanctuary networks

Source Vitality sanctuaries — Costa Rica, Miami, Bahamas & beyond

Freedom within *integrity*.

This positioning is intentional and protective — it honors the truth of what the device produces while keeping practitioners free of medical-device regulatory constraints.

What It Is

A sovereign biofield assessment instrument for the integrative, sub-health, and field-medicine paradigm.

A producer of deep, valuable, comprehensive sub-health pattern information.

A tool for biofield mapping, sovereign inquiry, education, and integrative tracking.

× What It Is Not

Not an FDA-cleared medical device, and not classified as a medical device.

FDA Disclaimer: Not used to diagnose, treat, cure, mitigate, or prevent any disease.

Findings are not diagnoses — they are pattern observations that may suggest further evaluation by a licensed practitioner.

SECTION 05

The Expanding Horizon

Thermal is the first instrument. Behind it: the full series of Full Spectrum & Inverted Spectrum Quantum Field Diagnostics.

THE FIELD MEDICINE READER FAMILY

Reading the body across *the full spectrum.*

A multi-modality family — each instrument extends practitioner perception further into spectra the human senses cannot directly read.

● DEPLOYED

Thermal
Thermal infrared — heat, vascular & inflammation patterns.

● DEPLOYED

Hyperspectral
Full spectrum — UV / visible / IR data cubes.

● DEPLOYED

Multispectral
Selected bands across multiple spectra.

● DEPLOYED

Photonic
Single-photon / quantum-light biofield reading.

● DEPLOYED

Spectroscopic
Spectrometer-based substance & tissue frequency analysis.

○ DEVELOPING

Acoustic
Photoacoustic & ultrasound-range hybrid imaging.

○ DEVELOPING

Inverted ★
Proprietary inverted-spectrum reading & recalibration apparatus.

○ DEVELOPING

Pro Suite
All modalities unified into one integrated practitioner station.

● DEPLOYED · AVAILABLE NOW · ○ DEVELOPING · ON THE HORIZON

GUARDIAN PRACTITIONER EXCHANGE · THREE WAYS TO STEP IN

The Instrument · *Energy Exchange.*

TIER I · THE ENTRY POINT

Threshold

- ✦ Field Medicine Reader — Thermal™ device
- ✦ 1 year of software reports — TCM & Traditional Medicine mapping
- ✦ Guardian Practitioner onboarding & initial training
- ✦ Quantiom Vault access

ENERGY EXCHANGE

\$8,888

FOUNDING-COHORT LAUNCH EXCHANGE

TIER II · THE DEVOTED PATH

Codex

- ✦ Field Medicine Reader™ device
- ✦ 3 years of software reports
- ✦ Guardian Practitioner onboarding & initial training
- ✦ Deeper Vault integration training
- ✦ Ongoing peer community access

ENERGY EXCHANGE

\$13,333

MOST CHOSEN PATH

TIER III · THE FULL FIELD

Sovereign Anchor

- ✦ Everything in Tier II · Codex
- ✦ Unlimited Quantiom Vault access — deep multidimensional recalibration across the entire quantum & physical field
- ✦ Priority on future family devices
- ✦ Founding Architect standing

ENERGY EXCHANGE

\$22,222

FOUNDING ARCHITECT

Founding-cohort launch exchange — earliest access at the most favorable terms. Honored through the Lions Gate.

The sovereign *intelligence layer*.

A standalone interface system — not as expansive as the full Vault, yet profound in its own right. It works in conjunction with any Field Reader™ device, or entirely on its own as a sovereign quantum field interface — streaming recalibrations directly into the quantum field.

TIER 1 · STANDALONE SOFTWARE

No Device Required

- ✦ For practitioners who already own Field Reader devices
- ✦ The sovereign intelligence interpretation layer
- ✦ Streams recalibrations into the quantum field

ENERGY EXCHANGE

\$4,444

ONE-TIME

◆ Or flow it: \$555/mo × 9 months (\$4,995 total)

TIER 2 · DEVICE ADD-ON

Alongside Any Device

- ✦ For practitioners receiving the interface alongside any Quantiom Field Reader™ device
- ✦ Full interface integration with the instrument
- ✦ Streams recalibrations into the quantum field

ENERGY EXCHANGE

\$3,333

ONE-TIME

◆ Or flow it: \$333/mo × 11 months (\$3,663 total)

333 · Master Cycle — the Christ Consciousness frequency flowing through a Master Number cycle.

Request a sample Intelligence Interface transmission report at info@quantiom.org · Quantiom.Earth

ALL OPTIONS AT A GLANCE

Every doorway, *clearly held.*

OPTION	WHAT FLOWS WITH IT	ENERGY EXCHANGE	WAYS TO FLOW IT
• Threshold TIER I • INSTRUMENT	Reader device • 1 yr reports • onboarding • Vault access	\$8,888	One-time
• Codex TIER II • INSTRUMENT	Reader device • 3 yrs reports • deeper Vault training • peer community	\$13,333	One-time
• Sovereign Anchor TIER III • INSTRUMENT	All of Codex • unlimited Vault • priority on future devices	\$22,222	One-time
• Intelligence Interface TIER 1 • STANDALONE	Sovereign intelligence layer • no device required	\$4,444	One-time • or \$555/mo × 9 (\$4,995)
• Intelligence Interface TIER 2 • ADD-ON	Interface alongside any Field Reader™ device	\$3,333	One-time • or \$333/mo × 11 (\$3,663)

All exchanges flow through Quantiom Guardian Ministries PMA • 508(c)(1)(a) • Founding-cohort launch exchange honored through the Lions Gate.

HOW TO ENROLL

A conversation, *not a transaction.*

1

Email

info@quantiom.org — subject “Field Medicine Reader — Guardian Practitioner Inquiry”

2

Share

The tier that feels aligned, and a few words about your practice.

3

Converse

A 30-minute conversation to explore alignment, walk through enrollment, confirm exchange & timeline.

4

Begin

If alignment is clear, formal enrollment and the onboarding journey begin.

The frontier is open. The instrument is in your hands — and the field is waiting to be read.

● FULLY DEPLOYED · ENROLLING NOW

K A ' T H I R A ' U N

The medicine of the *multidimensional body.*

This is medicine that sees what was previously unseen. This is medicine that reads what was previously unread. Welcome to the Field Medicine Reader family.
